Hi, I took a close look at your project – and honestly this is exactly what I do. To show you how I'd support your chatbot automation goals, I recorded a quick video for you:
🔗 https://www.loom.com/share/66f121bc35a246e69a5089029ab5dbc8?sid=e635c305-618e-4b80-986a-2b9214452094

You're looking for someone who can build bots using Bolt . new, Poppy . ai, Chatbase etc—and also connect them to Slack, sites or CRMs. That's right in my zone and I'd be happy to help out.

Here's how I can support:

✔️ fast and clean setup of bots using no-code tools like Poppy . ai, ManyChat, Chatbase
✔️ can connect tools through Zapier, APIs, webhooks or Make—whatever fits best
✔️ smart logic based flows to automate responses, leads or support
✔️ I'll make sure the bots are easy to update later and well documented
✔️ good with zoom calls, clear comms and staying on top of things

Just to mention—I'm still new on this platform but I've worked on similar stuff for off-platform clients. Everything from lead gen flows to slack-integrated bots.

some past work:
🔗 Bluehillsai . com- website chatbot using Chatbase + webhook to CRM sync
🔗 Slack bot built using Bolt . new to auto-route queries

Rate & Time:
💰 Fixed $200 works for me – can deliver quickly
⌛ ready to start right away + available for more projects down the line too

Let's build a bot that actually works and gets results.
excited to work together!

cheers,
Som
